

KIMBER KABLE PHILOSOPHY

For over two decades KIMBER KABLE has led the performance audio/video cable industry in technology, performance, and precision manufacturing. On this, our 25th anniversary year, we are more committed than ever to producing products of pre-eminent technical merit and performance.

KIMBER KABLE products are created using our own OSCaR engineering process. OSCaR stands for Objective Subjective Correlation and Results. Through this process we make the estimable and critical link between scientific measurements and listening impressions. This process is aided in great measure by our exceptionally advanced test and research facility, which is regarded as one of the most well equipped in the audio industry. In addition, KIMBER KABLE also has a vast research library which allows our engineering team access to past research as well as the latest technologies.

Our passion for cable is rooted in a simple philosophy: develop and manufacture cables that offer the highest correlation of performance and price. To reach this goal with each of our products requires an extraordinary amount of dedication, engineering, and team work. This philosophy has required us to invest a large percentage of our resources in technological developments, in-depth research and innovative manufacturing techniques.

Our hope is that the cables presented on this website help to enrich your home entertainment experience. If your passion for music or video presentation increases, as has ours, then we have done our job. There is nothing quite like experiencing a musical performance presented with all of music's natural timbre, lifelike tonality, and dimensional locale. These experiences have changed our lives and persuaded us to make the reproduction of audio and video our lifelong pursuit.
